Work Experience

Dinas Komunikasi Informatika Persandian dan Statistik – Bekasi Regency, West Java | Juni 2025 – Present

Software Engineer - Technical Consultant

- **Coordinated One Data Project Management & Stakeholder Engagement:** Coordinated and led socialization programs across 37 regional departments (OPDs), successfully boosting Bekasi Regency's One Data Indonesia quality score from 65.5 to 93.2.
- **One Map System Enhancement:** Upgraded the Bekasi One Map system from basic coordinate points to a GeoJSON dataset-based platform, enabling precise mapping for areas, lines, and coordinates.
- **EPSS System Development:** Developed the EPSS application to streamline monitoring and evaluation workflows for Coordinators, Data Stewards (Walidata), and regional departments.

PT. Gaido Cito Ekakurindo - Depok, West Java | Mar 2023 - Mei 2025

IT Lead

- **ERP Project Management:** Led the IT team in executing multi-branch ERP Supply Chain Management projects from planning to deployment with a 100% on-time completion rate.
- **Mobile App Development:** Built the Gaido Mobile app for Courier Management, significantly improving data-entry time efficiency for field couriers.
- **Web Performance Optimization:** Optimized the company profile website, driving PageSpeed performance from 65 to 98 while achieving a 100 SEO score.
- **Implementation & Training:** Led User Acceptance Testing (UAT) sessions and ERP socialization programs to ensure seamless adoption by internal users and business partners.

PT. Telkom Indonesia - Karawang, West Java | 2021

GIS & Web Developer (Internship)

- **Network Mapping Project:** Successfully mapped and digitally tracked over 7,000 areas across West Java using Google Earth to support accurate regional infrastructure planning.
- **Inventory Control Website Development (SDI Division):** Designed and developed a centralized web-based inventory tracking system (native PHP & Bootstrap) to streamline document and asset management for the division.

Project Experience

PT Mitra Utama Trading – Logistics Management System - 2026

Fullstack Developer (Project Base)

- **Development Acceleration:** Successfully designed and built a Progressive Web App (PWA) Logistic Management System from scratch in just 2 weeks, seamlessly transitioning core operations from manual record-keeping to an automated digital workflow.
- **Comprehensive Logistics Modules:** Engineered robust end-to-end features including Order Booking (customer order input), Job Execution (multi-leg routing), Invoicing & DP, HPP & Profit cost pooling, and Vendor Invoices.
- **Access Control & Real-Time Monitoring:** Implemented centralized Master Data, User Management, and Access Control (roles and permissions) modules, enabling Operations and Management teams to monitor business requirements in real-time with secure role-based governance.

PT. Key Lock Indonesia – Website Company Profile & Digital Marketing Strategy - 2026

Web Developer & Digital Marketing Strategist (Project Based)

- **SEO-Friendly Website Development:** Built an optimized corporate company profile website, securing top ranking positions on Google search results for core product keywords and driving massive organic traffic growth.
- **Digital Marketing Strategy (GBP & Google Ads):** Strategically managed Google Business Profile and executed targeted Google Ads campaigns, significantly increasing product search impressions and high-intent lead conversions.
- **Sales Conversion & Revenue Impact:** Successfully converted digital visibility into high-value sales, generating hundreds of millions of rupiah in closed deals (exceeding Rp150+ million in first month) and driving a substantial increase in overall conversion rates.

Dinas Ketahanan Pangan – Company Profile & SPBE - 2025

Fullstack Developer (Project Base)

- **Development:** Successfully developed and launched the official Company Profile website in an accelerated timeframe of just 3 weeks to fully support the Electronic-Based Government System (SPBE) initiative.
- **User Socialization & Training:** Led direct socialization and training sessions for internal staff, ensuring a smooth transition and immediate system adoption with minimal friction.
- **Content Management Empowerment:** Integrated Vue.js and Strapi CMS, empowering non-technical staff to manage and update website content independently and efficiently.

PT. Utama Karya Anugerah Persada - HRIS & Financial System - 2024

Fullstack Developer (Project Base)

- **HRIS & Operational Development:** Built a comprehensive web-based HRIS (Human Resource Information System) from scratch to digitize core company operations for an organization previously operating without a formal system.
- **Payroll & Financial Modules:** Developed essential modules covering employee attendance tracking, payroll management (including deductions and employee loans/debts), and corporate financial record-keeping.
- **User-Friendly UI/UX Design:** Designed a responsive and intuitive interface tailored to ensure a seamless transition from manual processes to digital adoption for all staff members.

BUMDES Kalijati - Desktop Financial & Inventory System - 2020

Freelance VB.NET Developer

- **Integrated Desktop Application Development:** Built a comprehensive desktop system covering financial accounting, sales management, Point of Sales (POS), and inventory tracking using VB.NET and SQL Server.
- **Operational Efficiency Enhancement:** Analyzed legacy system limitations to redesign workflow logic, streamlining financial reporting and eliminating manual stock discrepancies.

Education

2018 - 2022 | Universitas Buana Perjuangan | Karawang, West Java

Bachelor of Informatics Engineering, GPA 3.64/4.00

Organizational Experience

Student Executive Board (BEM) – Faculty of Engineering and Computer Science -
